

MOSES LAKE'S MOST WANTED:

CLEAN WATER ENEMY NO. 6:

THE FUNDRAISING GANG

Wanted for:

Detergent, solids and heavy metal pollution

It's a summer rite of passage, and a whole lot of fun! Charity car washes are a great way for groups to fundraise. But they can be bad for our lake.

Contact the City for tips on how to find a spot that does not drain to the lake. Get permission from business owners. Use a hose shut-off nozzle in between washes to minimize flow. And choose a low-phosphate detergent.

There are many ways to fundraise, including partnering with local commercial car washes, that can be healthy for our water, too.

CLEAN CARS AND CLEAN WATER. WE ALL WIN!

Want more tips? Call the Stormwater Department!
