THE FOLLOWING ITEMS ARE REQUIRED FOR SUBMITTAL:

Application Page

Battery / Voltage Drop Calculations

Equipment Specifications (Cut Sheet)

30" x 42" or 24" x 36" Drawings Designed by NICET Level III

Plans shall be submitted Electronically.

Please provide justification for the items listed above not included in this submittal package:

All work shall comply with applicable codes and standards including NFPA 70 &72 and the Moses Lake Municipal Code.

If any roof top units (RTU) duct smoke detectors are installed, they shall be supervised by this system and shall be wired to a supervisory zone only, and not an alarm initiating zone, as per MLMC 16.36.100 and is provided in NFPA 72.

The completed installation shall pass a visual inspection and complete operating test witnessed by a representative of the fire department. **Fire alarm systems shall be fully pre-tested and fully functional prior to scheduling the final inspection. The fire alarm system shall be live and NOT IN TEST MODE on arrival of the fire department. The first test will be testing connectivity with the dispatch center.** After this check, the system can be in test mode for the remainder of the acceptance inspection. Please call the permit technician with at least 24 hours' notice for inspections.

Contractors Record of Completion shall be provided to the Fire Marshal / Fire Inspector at the beginning of the test, and the system will not be accepted until form has been completed and copies provided to the fire department.

I hereby acknowledge that the information I have provided is correct and I agree to comply with all State and City laws and any ordinances regulating construction. I understand and agree the City of Moses Lake Fire Department has no obligation to explain every requirement and ordinance to me prior to approval of my project. I also acknowledge by signing this application I authorize any City of Moses Lake personnel access to the property at all reasonable times to ascertain relevant information, including the current condition of the property, and perform any and all inspections.

The issuance of a permit based on plans, specifications and other data shall not prevent the Fire Marshal from thereafter requiring the corrections of the errors in said plans, specifications and other data, or preventing building operations when in violation of this code of any State or City laws, rules or regulations. The granting of this permit or an approval does not presume to give authority to violate or cancel the provisions of any other Federal, State or City laws regulating construction, the performance of construction and/or operation of the project. Every permit issued under the provision of the MLMC shall expire by limitation and become null and void if the work authorized is not commenced for a period 180 days. I hereby certify that as a contractor I am currently registered and properly licensed as defined in RCW 18.27
